

The Royal Academy
of Engineering

What challenges will engineers face in 2030?

Would you like to develop your skill set to meet these challenges? If so, The Royal Academy of Engineering can help you.

The Academy in partnership with Engineers without Borders and several other leading providers has put together a programme of short courses to equip the Engineer of 2030.

This programme is offered through the Academy's Engineering Leadership Standard Award Scheme. It is open to all UK engineering undergraduates in any year and is designed to enhance the student's professional engineering career potential.

All courses are free but places are awarded on merit.

To register for details on the courses being offered in 2012, please visit:

www.engineeringleadershipawards.org.uk

The deadline date for registering your interest is 14 October 2011.

All other enquires should be addressed to undergraduate@raeng.org.uk
